FAX (414) 284-4125

*Dear Friends at Micor:*

*I am pleased to have worked with Micor on a problem we had with a trough in our steel processing plant, and that we were able to resolve it. This trough is approx. 24" x 16" x 130' in size. They helped us take a systematic approach to decide on a particular material and proper installation method, to overcome our chemical and temperature requirements.*

TO WHOM IT MAY CONCERN:

SUBJECT: MICOR COMPANY, INC.  
3232 NORTH 31ST STREET  
MILWAUKEE, WI 53216

The Corporate Facilities and Maintenance Department of Globe-Union Inc. contracted with the subject company through Robert Greenberg, President, for various floor repair and resurfacing projects since 1971. It has been our experience that Micor's prices are competitive with other  $\frac{1}{4}$ " thick trowelled on epoxy floor coatings.

We have been well satisfied with the performance of the material under the various acid conditions encountered at our Milwaukee Keefe Plant Battery Manufacturing areas and several battery branch plants, as well as its performance in Centralab Plating operations. Some minor problems that have been encountered were quickly rectified by Micor.

Micor's service has been very prompt, and they have not hesitated to handle any size project whether it be a \$200 repair or a \$5000 resurfacing project.

Very truly yours,

GLOBE-UNION INC.

Attention: Mr. Bob Greenberg

Dear Bob:

After two years of hard usage since installation, I am happy to report the floor installed in late summer of 1976 is in like new shape. This floor gets hard use in a busy tool shop. Steel wheeled carts with heavy molds are constantly pushed over the floor. There is no evidence of deterioration.

I would gladly recommend this material and Micor Company to anyone interested in a good durable floor.

Sincerely,

FLAMBEAU PRODUCTS CORPORATION

Lyle Getschman  
Supervisor, Tooling

To the President of Micor,

In my 35 years at the Johnston Co., we have never had a more conscientious and thorough contractor than Micor. Follow up from Frank Wabiszewski has made sure that the job has exceeded our expectations. The little extra paid, was well worth it and we will be definitely utilizing your services again.

Thanks for a job well done.

Sincerely,

Ferd Heun  
Maintenance Engineer

Gentlemen;

We have used your Micorox Crack Sealer for sealing the cracks in our collar floor, and have found it to be the best product of its type to-date. We are reordering the product because it stays in the cracks longer and sets up quickly enabling us to maintain our normal production schedule.

Attention: Bob Greenburg

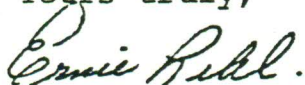

Dear Bob:

This letter is being submitted to confirm that the 3,468 running feet of Core Room aisles that you resurfaced with your material on our Purchase Order 37142-A in January of 1980, are still performing quite satisfactorily.

We have since started to inventory your material and perform small repairs with our own personnel.

We intend to continue to inventory your materials and are quite pleased with their performance.

Yours truly,

Ernie Lehl  
Core Room Supervisor

Gentlemen:

In response to your recent inquiry about our experience with Micorex Epoxy Crack Sealer, we are satisfied that this product does an adequate job of sealing the cracks in our cooler floors. The product has maintained its bond and stayed in the cracks keeping them sealed and leak-free.

Very truly yours,

Milwaukee, Wi. 53216

Dear Sir:

Our Micorox 201 epoxy floor is over four years old and is adhered to tile. Despite subjection to boiling water and sliding and bouncing milk cans during our seven day work week, the floor has held up very well. Based on past experience, I would not be surprised to see another 10 years of use from this installation.

Respectfully yours,

Robert J. Sutter, Plant Mgr.  
SLINGER CREAMERY INC.

**KOHLER**

February 10, 1992

Dear Barbara:

Congratulations. Your company has been recognized as an Outstanding Supplier for 1991. Our records indicate that you are one of a small group of suppliers who delivered twelve or more shipments to Kohler during 1991 with no rejections! Your 100% quality rating is outstanding and an achievement in which all members of your company can take great pride. On behalf of the Plumbing and Specialty Products Group of Kohler company, we thank you for your excellent performance during 1991 and invite you to make the extra effort to join the ranks of Certified Suppliers in 1992.

In the last half of 1989 we implemented an objective method of measuring our suppliers quality and delivery performance. During 1990 we began concentrating more of our purchases toward those identified as having the highest ratings. We also initiated a certification program late in 1989, and in 1990 we fully implemented our supplier certification program.

Kohler's P&SP Group currently has 22 Certified Suppliers who represent the "Best Of The Best". They have proven themselves as the type of supplier with which we want to do more business. Becoming a Certified Supplier is the highest status that can be reached for suppliers of Kohler's Plumbing Group.

Should you have any questions regarding our Supplier Certification Program, please feel free to contact one of us, or your Buyer contact. Best wishes for continued success in 1992.

Sincerely,
